

## 3.0 DRAFT EIR ERRATA

### 3.1 OVERVIEW

Evaluation of the comments reviewed relative to the Draft EIR impact analysis determined that, in general, the comments received did not require additional evaluation or changes to the conclusions reached, or alternatives to the Proposed Project. Changes or clarifications to the Draft EIR were made in response to some of the comments to the Draft EIR.

These changes and clarifications are described in Section 3.2 of this Final EIR. None of the changes contain significant new information that deprives the public of a meaningful opportunity to comment upon a substantial adverse environmental effect of the Proposed Project or a feasible way to mitigate or avoid such an effect. Additionally, the Final EIR does not present a feasible Project alternative or mitigation measure considerably different from others previously analyzed in the Draft EIR. All of the information added to the Final EIR merely clarifies, amplifies, or makes insignificant modifications in the Draft EIR. Therefore, recirculation of the Draft EIR is not required (see Guidelines Section 15088.5).

### 3.2 ERRATA

Table 3-1, Corrections to the Draft EIR, contains corrections and clarifications that are made to the text of the Draft EIR. See Appendix A for the errata pages.
